

PodKool step into meeting comfort!

Simple installation
Versatile
Efficient
Draught-free
Low noise

PodKool sets the standard in Pod air conditioning

With the new **PodKool** from *Invisible.AC*, meeting room and office pods can be comfortable, desirable working environments all year round. It puts an end to overheated, stuffy work spaces that hard working staff and office equipment have to share.

PodKool's revolutionary air-jet comfort is brought to you by *Invisible.AC*, world leaders in small duct high velocity (sdHVAC) technology.

LOOK WHAT PodKool has to offer in the working environment:

- Perfect cooling up to 2kW for any pod space
- Highest comfort levels for all occupants throughout the pod with pre-settable temperature down to 18°C
- Draught free space with no hot spots or uneven temperatures – it's so much more effective than traditional air-con.
- Very low noise and no audible disruption.

SEE HOW PodKool will appeal to installers, H&V stockists and specifiers:

- It's easy to install in new pods or retrofit to existing
- It's a fully self-contained, roof mounted, Plug & Play out of the box unit
- Simple settable temperature interface for the installer and no further user adjustment necessary
- Configurable for single and multiple pods with a choice of outlet and design options
- Easy maintenance and factory service exchange scheme
- Highly durable finish with full RAL colour matching.

Versatile **PodKool** is ideal for many other applications too. *Invisible.AC* provides full technical specifications, installation instructions and support.

Invisible.AC has continuously developed a range of sdHVAC products that meet fully the cooling, ventilation and heating requirements of users in the commercial and residential markets. Adhering to the strictest technical specification conformity requirements, **PodKool** is the latest innovation and it specifically addresses the need for the highest efficiency and most effective comfort for pods.

Technical Specifications

Description:

- **PodKool** from Invisible.AC is a self-contained – Plug & Play – packaged air-conditioning unit, with a nominal 2kW cooling duty.
- It is designed for specific use in internal office Pod type applications, for roof mounting on a suitably designed platform.
- The settable temperature control manages the Invisible.AC unique 'draught-free' air delivery technology. Any condensate water generated is automatically evaporated.
- Electrical Specification: Volts 220-240VAC / 50-60Hz
13amp standard supply.

Key Features:

- High comfort self-contained refrigeration system for cooling internal offices/meeting rooms – nominal duty – 2kW
- Fresh (external office) air make-up available – of up to 90 (l/s) litres per second.
- Power source 220-240VAC single-phase, 50/60Hz: Power 13amp standard supply.
- Unit dimensions – 500mm x 1025mm x 285mm
- Gross operational weight – 60kg.
- Manual temperature control setting – 18°C minimum.
- Nominal noise level (internal) NR30 – lower levels on request.
- Noise level (external) – Nominal NR40 at 3m from air-conditioner.
